WARNINGS AND CAUTIONS

CAUTION

SHORT CIRCUIT THE ANODE OF THE PICTURE TUBE AND THE ANODE CAP TO THE METAL CHASSIS, CRT SHIELD, OR CARBON PAINTED ON THE CRT, AFTER REMOVING THE ANODE.

WARNING!!

AN ISOLATION TRANSFORMER SHOULD BE USED DURING ANY SERVICE TO AVOID POSSIBLE SHOCK HAZARD, BECAUSE OF LIVE CHASSIS. THE CHASSIS OF THIS RECEIVER IS DIRECTLY CONNECTED TO THE AC POWER LINE.

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY SHADING AND MARK & ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS, AND IN THE PARTS LIST ARE CRITICAL FOR SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY. CIRCUIT ADJUSTMENTS THAT ARE CRITICAL FOR SAFE OPERATION ARE IDENTIFIED IN THIS MANUAL. FOLLOW THESE PROCEDURES WHENEVER CRITICAL COMPONENTS ARE REPLACED OR IMPROPER OPERATION IS SUSPECTED.

ATTENTION!!

APRES AVOIR DECONNECTE LE CAP DE L'ANODE, COURT-CIRCUITER L'ANODE DU TUBE CATHODIQUE ET CELUI DE L'ANODE DU CAP AU CHASSIS METALLIQUE DE L'APPAREIL, OU AU COUCHE DE CARBONE PEINTE SUR LE TUBE CATHODIQUE OU AU BLINDAGE DU TUBE CATHODIQUE.

ATTENTION!!

AFIN D'EVITER TOUT RESQUE D'ELECTROCUTION PROVENANT D'UN CHÁSSIS SOUS TENSION, UN TRANSFORMATEUR D'ISOLEMENT DOIT ETRE UTILISÉ LORS DE TOUT DÉPANNAGE. LE CHÁSSIS DE CE RÉCEPTEUR EST DIRECTEMENT RACCORDÉ À L'ALIMENTATION SECTEUR.

ATTENTION AUX COMPOSANTS RELATIFS A LA SECURITE!!

LES COMPOSANTS IDENTIFIES PAR UNE TRAME ET PAR UNE MARQUE SUR LES SCHEMAS DE PRINCIPE, LES VUES EXPLOSEES ET LES LISTES DE PIECES SONT D'UNEIMPORTANCE CRITIQUE POUR LA SECURITE DU FONCTIONNEMENT. NE LES REMPLACER QUE PAR DES COMPOSANTS SONY DONT LE NUMERO DE PIECE EST INDIQUE DANS LE PRESENT MANUEL OU DANS DES SUPPLEMENTS PUBLIES PAR SONY. LES REGLAGES DE CIRCUIT DONT L'IMPORTANCE EST CRITIQUE POUR LA SECURITE DU FONCTIONNEMENT SONT IDENTIFIES DANS LE PRESENT MANUEL. SUIVRE CES PROCEDURES LORS DE CHAQUE REMPLACEMENT DE COMPOSANTS CRITIQUES, OU LORSQU'UN MAUVAIS FONTIONNEMENT SUSPECTE.

SELF-DIAGNOSTIC FUNCTION

The units in this manual contain a self-diagnostic function. If an error occurs, the STANDBY/STEREO LED will automatically begin to flash. The number of times the LED flashes translates to a probable source of the problem. A definition of the STANDBY/STEREO LED flash indicators is listed in the instruction manual for the user's knowledge and reference. If an error symptom cannot be reproduced, the Remote Commander can be used to review the failure occurrence data stored in memory to reveal past problems and how often these problems occur.

Diagnostic Test Indicators

When an error occurs, the STANDBY/STEREO LED will flash a set number of times to indicate the possible cause of the problem. If there is more than one error, the LED will identify the first of the problem areas. Due to a hardware upgrade, there is no LED flashing in sets using Ver.1.0 system micros. This has been addressed in Ver.2.0 system micros.

Results for all of the following diagnostic items are displayed on screen. No error has occurred if the screen displays a "0".

| Diagnostic Item/Description | No. of times STANDBY/STEREO LED flashes | Self-diagnostic Display/ Diagnostic result | Probable Cause Location | Detected Symptoms |
|--------------------------------------|---|--|---|--|
| Power does not turn on | Does not light | | Power cord is not plugged in. Fuse is burned out. (F5501) | Power does not come on. No power is supplied to the TV. AC power supply is faulty. |
| +B overcurrent (OCP) (see Note 1) | 2 times | 2:0 or 2:1 | H.OUT (Q5030) is shorted. (D board) +B PWM (Q5003) is shorted. (D board) IC9001,IC9002, IC9003 is shorted. (C board) | Power does not come on. Load on power line is shorted. |
| Low B overvoltage (OVP) | 3 times | 3:0 or 3:1 | IC6505 is faulty. (D Board) | Has entered standby mode. |
| Vertical deflection stopped | 4 times | 4:0 or 4:1 | +/-15V is not supplied. (D board) IC 5004 is faulty. (D board) | Has entered standby state after horizontal raster. Vertical deflection pulse is stopped. Power line is shorted or power supply is stopped. |
| White balance failure (not balanced) | 5 times | 5:0 or 5:1 | Video OUT (IC9001-IC9003) is faulty. (C board) CRT Drive (IC201) is faulty. (A Board) G2 is improperly adjusted. (see Note 2) | No raster is generated. CRT cathode current detection reference pulse output is small |

KV-32XBR400/36XBR400/36XBR400H/38DRC1/38DRC1C

| Diagnostic Item/Description | No. of times STANDBY/STEREO LED flashes | Self-diagnostic Display/ Diagnostic result | Probable Cause Location | Detected Symptoms |
|--|---|--|--|-------------------|
| LOW B OCP/OVP (overcurrent/overvoltage) (see Note 3) | 6 times | 6:0 or 6:1 | +5 line is overloaded. (A, B Boards) +5 line is shorted. (A, B Boards) IC6007 is faulty. (A Board) | No picture |
| Horizontal Deflection Stopped | 7 times | 7:0 or 7:1 | | No picture |

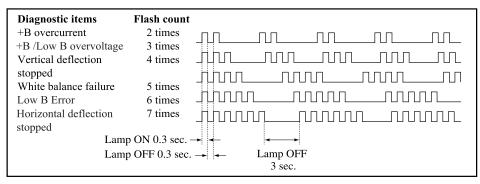

Note 1: If a +B overcurrent is detected, stoppage of the vertical deflection is detected simultaneously.

The symptom that is diagnosed first by the microcontroller is displayed on screen.

Note 2: Refer to Screen (G2) Adjustment in Section 3-4 of this manual.

Note 3: If STANDBY/STEREO LED flashes 6 times, unplug unit and wait ten seconds before performing adjustment.

Display of Standby/Timer LED Flash Count

Stopping the STANDBY/STEREO LED Flash

Turn off the power switch on the TV main unit or unplug the power cord from the outlet to stop the STANDBY/STEREO LED from flashing.

Self-Diagnostic Screen Display

For errors with symptoms such as "power sometimes shuts off" or "screen sometimes goes out" that cannot be confirmed, it is possible to bring up past occurrences of failure on the screen for confirmation.

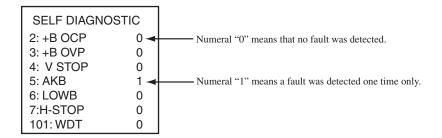

To Bring Up Screen Test

In standby mode, press buttons on the Remote Commander sequentially, in rapid succession, as shown below:

Note that this differs from entering the service mode (sound volume $\frac{1}{2}$).

Self-Diagnostic Screen Display

^{*}One flash count is not used for self-diagnostic.

Handling of Self-Diagnostic Screen Display

Since the diagnostic results displayed on the screen are not automatically cleared, always check the self-diagnostic screen during repairs. When you have completed the repairs, clear the result display to "0".

Unless the result display is cleared to "0", the self-diagnostic function will not be able to detect subsequent faults after completion of the repairs.

Clearing the Result Display

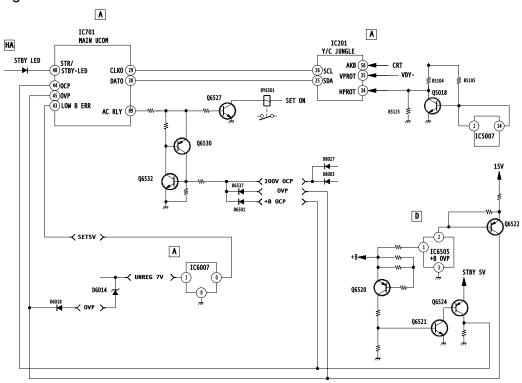

To clear the result display to "0", press buttons on the Remote Commander sequentially when the diagnostic screen is displayed, as shown below:

Channel 8 → ENTER

Quitting the Self-Diagnostic Screen

To quit the entire self-diagnostic screen, turn off the power switch on the Remote Commander or the main unit.

Self-Diagnostic Circuit

+B overcurrent (OCP) Occurs when an overcurrent (more than 6A) on the +B (135V) line is detected by R6598/

R6591. It will cause Q6520 to turn on and force the AC relay to turn off through Q6532 and

Q6530.

+B overvoltage (OVP) Occurs when 1) overvoltage (more than +140V) on the +B (135V) line is detected by IC6505

or 2) an overvoltage (more than 7.5V) on the unreg 7V line is detected by D6014. The AC

Relay will turn off through Q6532 and Q6530.

Vertical Deflection Stopped Occurs when an absence of the vertical deflection pulse is detected by IC201. Power supply

will shut down when waveform interval exceeds 2 seconds.

White Balance Failure If the RGB levels do not balance within 2 seconds after the power is turned on, this error will

be detected by IC201. The unit will stay on, but there will be no picture.

*(Refers to the RGB levels of the AKB detection Ref pulse that detects 1K).

Low B Error Occurs when set 5V is out.

Horizontal Deflection Stopped Occurs when either 1) a +B overcurrent is detected (IC5007) or 2) overheating is detected

(Thermistor TH5002).

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

- Check the area of your repair for unsoldered or poorly soldered connections. Check the entire board surface for solder splashes and bridges.
- 2. Check the interboard wiring to ensure that no wires are "pinched" or touching high-wattage resistors.
- Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced.
 Be absolutely certain that you have replaced all the insulators.
- Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair.
 Point them out to the customer and recommend their replacement.
- Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
- Check the line cords for cracks and abrasion.
 Recommend the replacement of any such line cord to the customer.
- Check the B+ and HV to see if they are specified values. Make sure your instruments are accurate; be suspicious of your HV meter if sets always have low HV.
- Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

Leakage Test

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

- A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instructions.
- 2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
- 3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low voltage scale. The Simpson's 250 and Sanwa SH-63TRD are examples of passive VOMs that are suitable. Nearly all battery-operated digital multimeters that have a 2 VAC range are suitable (see Figure A).

How to Find a Good Earth Ground

A cold-water pipe is a guaranteed earth ground; the coverplate retaining screw on most AC outlet boxes is also at earth ground. If the retaining screw is to be used as your earth ground, verify that it is at ground by measuring the resistance between it and a cold-water pipe with an ohmmeter. The reading should be zero ohms. If a cold-water pipe is not accessible, connect a 60- to 100-watt trouble- light (not a neon lamp) between the hot side of the receptacle and the retaining screw. Try both slots, if necessary, to locate the hot side on the line; the lamp should light at normal brilliance if the screw is at ground potential (see Figure B).

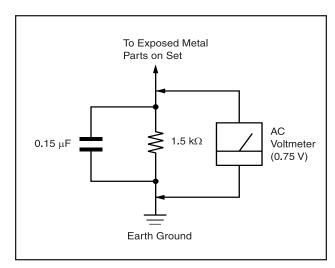

Figure A. Using an AC voltmeter to check AC leakage.

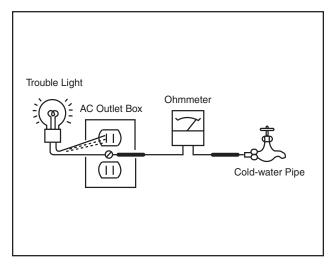

Figure B. Checking for earth ground.

SECTION 1 GENERAL

The instructions mentioned here are partial abstracts from the Operating Instruction Manual. The page numbers shown reflect those of the Operating Instruction Manual.

Introducing the FD Trinitron Wega

Using the Remote Control

Inserting Batteries

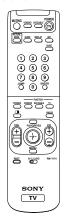

Insert two size AA (R6) batteries (supplied) by matching the $+\ and\ -$ on the batteries to the diagram inside the battery compartment.

Remove the batteries to avoid damage from possible battery leakage whenever you anticipate that the remote control will not be used for an extended period.
Handle the remote control with care. Avoid dropping it, getting it wet, or placing it in direct sunlight, near a heater, or where the humidity is high.

Remote Control Overview

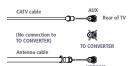

Here's an overview of the buttons on the remote control you will probably use most often. For a complete description of the remote control, see "Using the Remote Control" on page 40.

| To Do This | Use This Button | |
|--|--|--|
| Turn the TV on and off | TV (POWER) | |
| Select channels | 0 – 9 and ENTER | |
| directly | Press 0 – 9 to select a channel, the channel changes after 2 seconds. Press ENTER for immediate selection. | |
| Scan through channels | CH +/- | |
| | To scan rapidly through the channels, press and hold down the CH+ or CH- button. | |
| Adjust the volume | VOL +/- | |
| Switch video inputs (such as a VCR) | TV/VIDEO Press repeatedly to toggle through all video inputs. | |
| Display the Menu to | MENU | |
| make changes to the TV | For details, see "Using the Menus" on page 25. | |
| View the Favorite | FAVORITES | |
| Channels list | For details, see "Using Favorite Channels" on page 20. | |
| Using the on-screen functions | Move Resect | |

Installing the TV

Cable and Antenna

If your cable provider does not feature local channels, you may find this set up convenient.

Select CABLE or antenna (ANT) mode by pressing ANT on the remote

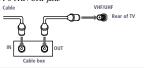

In order to receive channels with an antenna, you need to turn your Cable to OFF and perform the Auto Program function (see page 30).

Cable Box Connections

Some pay cable TV systems use scrambled or encoded signals that require a cable box to view all channels.

Cable Bo

- Connect the coaxial connector from your cable service to the cable box's IN jack.
- 2 Using a coaxial cable, connect the cable box's OUT jack to the TV's VHF/UHF jack.

If you will be controlling all channel selection through your cable box, you should consider using the Channel Fix feature (see page 30).

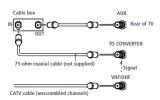

7

Installing the TV

Cable Box and Cable

For this set up, you can switch between scrambled channels (through your cable box), and normal (CATV) channels by pressing ANT on the remote control.

3

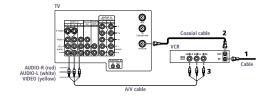

Your Sony remote control can be programmed to operate your cable box (see "Programming the Remote Control" on page 42).
When using Favorite Channel or Twin View, you cannot view the AUX input in the

Pressing ANT switches between these inputs.

If you are connecting a cable box through the AUX input and would like to switch between the AUX and normal (CATV) input you should consider using the Channel Fix feature (see page 30). Installing the TV

Connecting a VCR and Cable

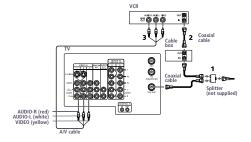

- 1 Connect the cable TV cable to the VCR's IN jack.
- 2 Using a coaxial cable, connect the VCR's OUT jack to the TV's VHF/UHF jack.
- 3 Using an A/V cable, connect the VCR's A/V OUT jacks to the TV's A/V IN jacks.
- #3 If your VCR has an S VIDEO jack: For best picture quality, use an S VIDEO connection instead of the yellow video cable on your combined AV cable. Using an S VIDEO cable, connect the VCR'S S VIDEO OUT jack to the TV's S VIDEO IN jack. S VIDEO does not provide audio, so audio cables must still be connected to provide sound.

Installing the TV

Connecting a VCR and Cable Box

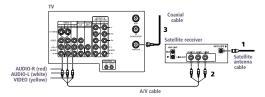

- Connect the single (input) jack of the splitter to your incoming cable connection, and connect the other two (output) jacks (using coaxial cable) to IN on your cable box and VHF/UHF on your TV.
- 2 Using a coaxial cable, connect the cable box's OUT jack to the VCR's VHF/UHF IN jack.
- 3 Using an A/V cable, connect the VCR's A/V OUT jacks to the TV's A/V IN jacks.
- If your VCR has an S VIDEO jack: For best picture quality, use an S VIDEO connection instead of the yellow video cable on your combined AV cable. Using an S VIDEO cable, connect the VCR'S S VIDEO OUT jack to the TV's S VIDEO IN Jack. S VIDEO does not provide audio, so audio cables must still be connected to provide sound.

Installing the TV

Connecting a Satellite Receiver

- Connect the satellite antenna cable to the satellite receiver's SATELLITE IN jack.
- 2 Using an A/V cable, connect the satellite receiver's A/V OUT jacks to the TV's A/V IN jacks.
- Connect a coaxial cable from your cable or antenna to the TV's VHF/UHF jack.
- ✓ If your satellite receiver has an S VIDEO jack: For best picture quality, use an S VIDEO connection instead of the yellow video cable on your combined AV cable. Using an S VIDEO cable, connect the satellite receiver's VIDEO OUT jack to the TV's S VIDEO IN jack. S VIDEO does not provide audio, so audio cables must still be connected to provide sound.

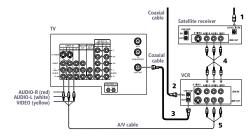

10

12

Installing the TV

Connecting a Satellite Receiver with a VCR

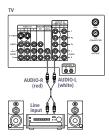

- Connect the satellite antenna cable to the satellite receiver's SATELLITE IN jack.
- 2 Connect the CATV cable to the VCR's VHF/UHF IN jack.
- 3 Using a coaxial cable, connect the VCR's OUT jack to the TV's VHF/UHF jack.
- 4 Using an A/V cable, connect the satellite receiver's A/V OUT jacks to the VCR's A/V IN jacks.
- 5 Using an A/V cable, connect the VCR's A/V OUT jacks to the TV's A/V IN jacks.

Installing the TV

Connecting an Audio Receiver

1 Using audio cables, connect the TV's AUDIO OUT jacks to the audio receiver's audio LINE IN jacks.

- 9 -

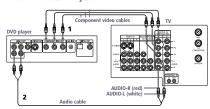

Installing the TV

Connecting a DVD Player with Component Video Connectors

1 Using three separate component video cables, connect the DVD player's Y, PB, and PR jacks to the Y, PB, and PR jacks on the TV.

The Y, Pa, and Pa jacks on your DVD player are sometimes labeled Y, Ca, and CR, or Y, B-Y, and R-Y. If so, connect the cables to like colors.
The Y, Pa, and Pa jacks do not provide audio, so audio cables must be connected to provide sound.

2 Using an audio cable, connect the DVD player's audio OUT jacks to the TV's audio IN jacks.

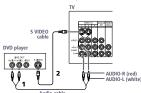

Installing the TV

Connecting a DVD Player with A/V Connectors

If your DVD player has video component output connectors: for best picture quality use the connection described on page 15.

- Using audio cables, connect the DVD player's audio OUT jacks to the TV's audio IN jacks.
- 2 Using an S VIDEO cable, connect the DVD player's S VIDEO jack to the TV's S VIDEO jack.

15

16

Installing the TV

Connecting a Digital TV Receiver

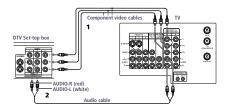

Be sure to read the manual for the Set-top box.

Using three separate component video cables, connect the Digital TV Set-top box's Y, P_B , and P_R jacks to the TV.

In Pt, P8, and PR jacks do not provide audio, so audio cables must be connected to provide sound.

Component input (Y, P8, and PR) is recommended for optimum picture quality. You may also use component video or 5 Video connections.

2 Using an audio cable, connect the DTV Set-top box's audio OUT jacks to the TV's audio IN jacks.

Connecting a Camcorder

 Using A/V cables, connect the camcorder's A/V OUT jacks to the TV's A/V IN jacks.

If you have a mono camcorder, connect its left audio output to the TV's AUDIO L jack.

For easy connection of the camcorder, the TV has front A/V inputs (shown below).

However, if you prefer, you can also connect the camcorder to the TV's rear A/V IN jacks.

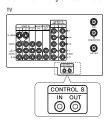

Installing the TV

Using the CONTROL S Feature

CONTROL S allows you to control your TV system and other Sony equipment with one remote control.

To control your other Sony equipment with your TV's remote control, use a CONTROL S cable (not supplied) to connect the equipment's CONTROL S IN jack to the TV's CONTROL S OUT jack.

Setting Up the TV Automatically

After you finish connecting your TV, you need to run Auto Setup to set up your channels.

In the Auto Setup feature does not apply for installations that use a cable box for all

Using Auto Setup

1 Press POWER to turn on the TV.

The first time you turn on the TV, the Auto Setup screen appears.

2 Press CH+ to run Auto Setup or press CH- to exit.

You can run Auto Program by selecting it in the Channel menu, as described on page 30.

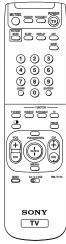

Other Information

Using the Remote Control

The following table describes the buttons on the remote control that are for more advanced functions.

Main Power button must be turned ON to activate the Remote Control.

Button Descriptions

| Button | Description |
|-------------------------|---|
| MUTING | Press to mute the sound. Press again or press VOL + to restore the sound. |
| VCR/DVD (POWER) | Turns the DVD player, MDP player, or VTR (VCR) on and off. |
| SAT/CABLE (POWER) | Turns the satellite receiver or cable box on and off. |
| TV (POWER) | Turns the TV on and off. |
| PICTURE MODE | Press repeatedly to step through the available video picture modes: Vivid, Standard, Pro, Movie. Also available in the Video menu. For details, see "Selecting Video Options" on page 26. |
| SLEEP | Press repeatedly until the TV displays the time in minutes (15, 30, 45, 60, or 90) that you want the TV to remain on before shutting off automatically. Cancel by pressing until SLEP OFF appears. While Sleep feature is set, press once to view remaining time. |
| DISPLAY | Press once to display the current time and channel labe (if set) and channel number. Press again to turn Display off. See page 34 for details on setting the time. |
| ANT | Changes the VHF/UHF input to the AUX input. |
| GUIDE | Displays the program guide of your satellite antenna. |
| 0 – 9 and ENTER | Press 0 – 9 to select a channel, the channel changes afte 2 seconds. Press ENTER for immediate selection. |
| JUMP | Press to jump back and forth between two channels. Th TV alternates between the current channel and the last channel that was selected. |
| TV/VIDEO | Cycles through available video inputs: TV, VIDEO 1, VIDEO 2 VIDEO 3, VIDEO 4, VIDEO 5, VIDEO 6. |
| VCR/DVD (FUNCTION) | Activates the remote control for use with a DVD player MDP, or VTR (VCR). |
| SAT/CABLE (FUNCTION) | Activates the remote control for use with a satellite receiver or cable box. |
| TV (FUNCTION) | Activates the remote control for use with the TV. |

Turns on/off Twin Mode. For details, see "Using Twin View" on page 21. FREEZE Freezes the window picture. Press again to restore the VOL +/-Displays the Favorite Channels list. For details, see "Using Favorite Channels" on page 20. FAVORITES Scan through channels. Joystick allows for movement of the on-screen cursor Pressing down on the center of the joystick selects the \odot Press to display the TV menu. Press again to exit from the menus. MENU

Other Information

Resets the TV to the factory default settings for the Video and Audio menus. (Clears setting on Channel and Timer) RESET Use to switch control for connected video equipment. AV 12 3 DVE You can program one video source for each switch position (see page 42).

TWIESO VORDOS SATICABLE TV

To scan rapidly through the

channels, press and hold down the CH+ or CH- button.

Inside Panel Changes the VHF/UHF output of the VCR. TV/VCR Play Fast-forward Displays the DVD menu DVD MENU REC Record Displays the DVD menu. ▶▶ or ◀◀ during playback (release to resume normal playback) Press 0 – 9 to select a VCR channel, the channel changes 0 – 9 and ENTER after 2 seconds. Press ENTER for immediate selection Used for programming the remote control to operate non-Sony video equipment. For details, see "Programming the Remote Control" on page 42.

40 41

Other Information

Programming the Remote Control

The remote control is preset to operate Sony brand video equipment.

| Sony Equipment | Switch Position on Remote Control | Programmable Code Number |
|--------------------|--------------------------------------|-----------------------------|
| Beta, ED Beta VCRs | VTR1 | 303 |
| 8 mm VCR | VTR2 | 302 |
| VHS VCR | VTR3 | 301 |
| DVD Player | DVD/MDP | 751 |

If you have video equipment other than Sony brand that you want to control with the TV's remote control, use the following procedures to program the remote control.

 $\begin{tabular}{ll} \end{tabular}$ The equipment must have infrared (IR) remote capability in order to be used with the

Turn to "Programmable Codes" on page 43, and find the three-digit code number for your equipment. If more than one code number is listed, use the number listed first to complete the following procedure

You must perform step 3 within 10 seconds of step 2, or you must start again from

To check if the code numb works, after step 5 aim the TV's remote control at the component and press the POWER button that and press the POWEN DULLON BIRD.

corresponds with that component. If

4 Enter the three-digit code number. it responds, you're done. If not, try using the other codes listed for your 5 component.

42

- 2 Press CODE SET
- 3 Move the slide switch to the desired input.

- If more than one code number is listed, try entering them one by one until you come to the correct code for your equipment. If you enter a new code number, the code number you previously
- ntered at that setting is erased.
- In some rare cases, you may not be able to operate your equipment with the supplied remote control. In this case, use the equipment's own remote control unit.
- Whenever you remove the batteries to replace them, the code numbers may revert to the factory setting and must be reset.

Troubleshooting

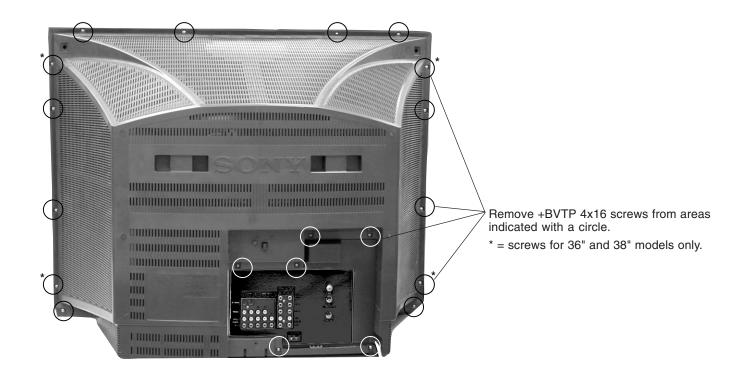

| Problem | Poss | ible Remedies |
|----------------------------|------|---|
| No picture | a | If your TV does not turn on, and a red light keeps flashing, your TV may |
| (screen not lit), no sound | _ | need service. Call your local Sony Service Center. |
| (| | Make sure the power cord is plugged in. |
| | | Push the power button on the front of the TV. |
| | | Check to see if the TV/VIDEO setting is correct: when watching TV, set to TV, and when watching connected equipment, set to VIDEO 1, 2, 3, 4, 5 or 6. |
| | | Try another channel. It could be station trouble. |
| Remote control | | Batteries could be weak. Replace the batteries. |
| does not operate | | Press TV (FUNCTION) when operating your TV. |
| | | Make sure the TV's power cord is connected securely to the wall outlet. |
| | | Locate the TV at least 3-4 feet away from fluorescent lights. |
| | | Check the orientation of the batteries. |
| Dark, poor or no | | Adjust the Picture setting in the Video menu (see page 26). |
| picture (screen lit), | | Adjust the Brightness setting in the Video menu (see page 26). |
| good sound | | Check antenna/cable connections. |
| Good picture, | | Press MUTING so that "MUTING" disappears from the screen (see page 40). |
| no sound | | Make sure Speaker is set to ON in the Audio menu (see page 28). |
| Cannot receive upper | | Change Cable to OFF (see page 30). |
| channels (UHF) when using | g 🛄 | Use Auto Program in the Channel menu to add receivable channels that are |
| an antenna | | not presently in TV memory (see page 30). |
| No color | | Adjust the Color settings in the Video menu (see page 26). |
| Only snow and noise appea | ır 🗆 | Check the antenna/cable connections. |
| on the screen | | Make sure the channel is broadcasting programs. |
| | | Press ANT to change the input mode (see page 40). |
| Dotted lines | | Adjust the antenna. |
| or stripes | | Move the TV away from noise sources such as cars, neon signs, or hair- |
| | | dryers. |
| TV is fixed to one channel | | Use Auto Program in the Channel menu to add receivable channels that are |
| | | not presently in TV memory (see page 30). |
| | | Check your Channel Fix settings (see page 30). |
| Double images or ghosts | | Use a highly directional outdoor antenna or a cable (when the problem is |
| 0 0 | | caused by reflections from nearby mountains or tall buildings). |
| Cannot operate menu | | If the item you want to choose appears in gray, you cannot select it. |
| Cannot receive any channel | s 🗆 | Use Auto Program in the Channel menu to add receivable channels that are |
| when using cable TV | | not presently in TV memory (see page 30). |
| = | | Check your cable settings. |
| | | Make sure Cable is set to ON in the Channel menu (see page 30). |

| Problem | Poss | sible Remedies |
|--|------|--|
| Cannot gain enough volum when using a cable box | ne 🗆 | Increase the volume of the cable box using the cable box's remote control. Then press TV (FUNCTION) and adjust the TV's volume. |
| Cannot receive channels | | Use Auto Program in the Channel menu to add receivable TV channels that are not presently in TV memory (see page 30). |
| Unable to select a channel | | Use Auto Program in the Channel menu to add receivable TV channels that are not presently in TV memory (see page 30). |
| Lost password | | In the password screen (see page 31), enter the following master password: 4357. The master password clears your previous password; it cannot be used to temporarily unblock channels. |

If, after reading these operating instructions, you have additional questions related to the use of your Sony television, please call our Customer Information Services Center at 1-800-222-SONY (7669) (U.S. residents only) or (416) 499-SONY (7669) (Canadian residents only).

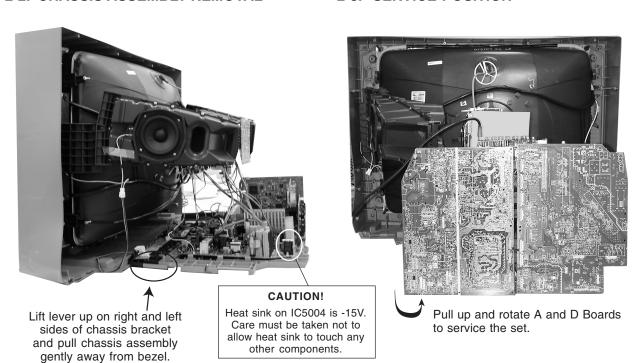

SECTION 2 DISASSEMBLY

2-1. REAR COVER REMOVAL

2-2. CHASSIS ASSEMBLY REMOVAL

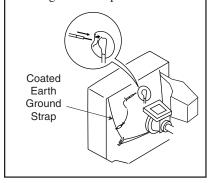

2-3. SERVICE POSITION

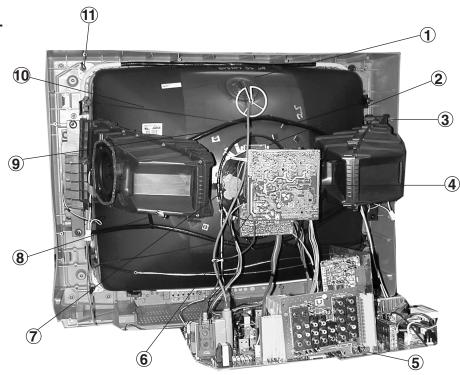

2-4. PICTURE TUBE REMOVAL

WARNING: BEFORE REMOVING THE ANODE CAP

High voltage remains in the CRT even after the power is disconnected. To avoid electric shock, discharge CRT *before* attempting to remove the anode cap. Short between anode and CRT coated earth ground strap.

- 1. Discharge the anode of the CRT and remove the anode cap.
- 2. Unplug all interconnecting leads from the deflection yoke, neck assembly, degaussing coils and CRT grounding strap.
- 3. Remove speaker assemblies.
- 4. Remove the C Board from the CRT.
- 5. Remove the chassis assembly.
- 6. Loosen the neck assembly fixing screw and remove.

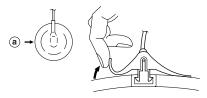

- 7. Loosen the deflection yoke fixing screw and remove.
- Place the set with the CRT face down on a cushion and remove the degaussing coil holders.
- 9. Remove the degaussing coils.
- 10. Remove the CRT grounding strap and spring tension devices.
- 11. Unscrew the four CRT fixing screws [located on each CRT corner] and remove the CRT [Take care not to handle the CRT by the neck].

ANODE CAP REMOVAL

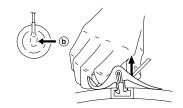

WARNING: High voltage remains in the CRT even after the power is disconnected. To avoid electrical shock, discharge the CRT **before** attempting to remove the anode cap. Short between anode and coated earth ground strap of CRT.

NOTE: After removing the anode, short circuit the anode of the picture tube and the anode cap to either the metal chassis, CRT shield, or carbon painted on the CRT.

REMOVAL PROCEDURES

1 Turn up one side of the rubber cap in the direction indicated by arrow (a).

② Use your thumb to pull the rubber cap firmly in the direction indicated by arrow ⑥.

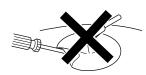

③ When one side of the rubber cap separates from the anode button, the anode cap can be removed by turning the rubber cap and pulling it in the direction of arrow ⓒ.

HOW TO HANDLE AN ANODE CAP

- ① Do not use sharp objects which may cause damage to the surface of the anode cap.
- ② To avoid damaging the anode cap, do not squeeze the rubber covering too hard. A material fitting called a shatter-hook terminal is built into the rubber.
- ③ Do not force turn the foot of the rubber cover. This may cause the shatter-hook terminal to protrude and damage the rubber.

SECTION 3 SET-UP ADJUSTMENTS

The following adjustments should be made when a complete realignment is required or when a new picture tube is installed.

These adjustments should be performed with rated power supply voltage unless otherwise noted.

Set the controls as follows unless otherwise noted:

VIDEO MODE: STANDARD (RESET)

Perform the adjustments in order as follows:

- 1. Beam Landing
- 2. Convergence
- 3. Focus
- 4. Screen (G2)
- 5. White Balance

Note: Test equipment required:

- Color Bar Pattern Generator
- Degausser
- DC Power Supply
- Digital Multimeter

3-1. BEAM LANDING

Before beginning adjustment procedure:

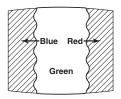

• Face the picture tube in East or West direction to reduce the influence of geomagnetism.

NOTE: Do not use hand degausser because it magnetizes CRT.

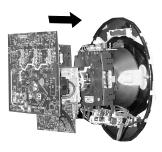

- Input white pattern from pattern generator. Set the PICTURE control to maximum and BRIGHTNESS control to standard.
- 2. Perform Focus, G2 and White Balance adjustments.
- 3. Loosen the deflection yoke mounting screw and set the purity control to the center as shown below.

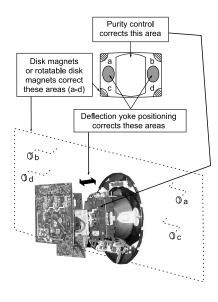

- 4. Input a green pattern from the pattern generator.
- 5. Move the deflection yoke backwards and adjust the purity control so that green is in the center and red and blue are even on both sides.

6. Move the deflection yoke forward and adjust so that the entire screen becomes green.

- 7. Switch over the raster signal to red and blue and confirm the condition.
- 8. When the position of the deflection yoke is determined, tighten it with the deflection yoke mounting screw.
- 9. If landing at the corner is not right, adjust by using the disk magnets.

3-2. V-PIN and V-CEN ADJUSTMENT

Before beginning adjustment procedure:

- Input a cross hatch pattern signal.
- Face the picture tube in North/South direction and correct rotation.
- Video Mode: Standard (Reset)
- 1. Adjust service mode CXA2150D-1 04 VCEN so that top pin and bottom pin are symmetrical from top to bottom.
- 2. Adjust service mode CXA2150D-1 05 VPIN so top and bottom pin are symmetrical from top to bottom.
- 3. Lines should be straight from left to right. Check landing for side effect.

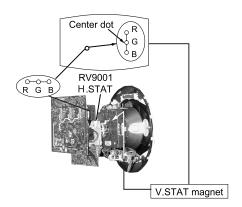

3-3. CONVERGENCE ADJUSTMENT

Before starting convergence adjustments:

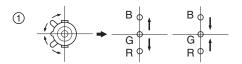

- Set CONTRAST AND BRIGHTNESS control to 50%.
- Input dot pattern signal.

Vertical and Horizontal Static Convergence

- 1. Disconnect dynamic convergence before adjusting static convergence (CN5510), except for minor touch-up.
- 2. Adjust H.STAT convergence, RV 9001, to converge red, green and blue dots in the center of the screen.
- 3. Adjust V.STAT magnet to converge red, green and blue dots in the center of the screen.

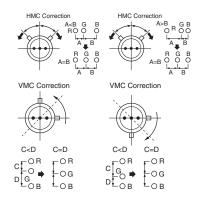

4. Tilt the V.STAT magnet and adjust static convergence to open or close the V.STAT magnet.

Operation of BMC (Hexapole) Magnet

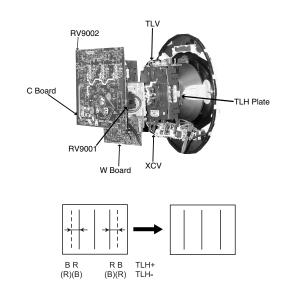

The respective dot positions resulting from moving each magnet interact, so perform the following adjustment while tracking.

Use the V.STAT tabs to adjust the red, green, and blue dots so they line up at the center of the screen (move the dots in a horizontal direction.)

TLH Plate Adjustment

- Input crosshatch pattern.
- Adjust unbalanced horizontal convergence of red and blue dots by adjusting TLH plate on the deflection yoke.

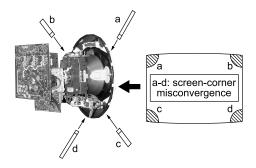

- 1. Adjust XCV core to balance X axis.
- Adjust vertical red and blue convergence with V.TILT (TLV VR).

Note: Perform adjustments while tracking item 1.

Screen-Corner Convergence

- Input crosshatch pattern.
- 1. Affix a permalloy assembly corresponding to the misconverged areas.

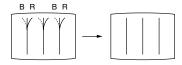

Dynamic Convergence Adjustments

Set dynamic convergence using the following service mode adjustment data:

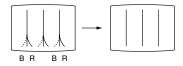

CXA 8070 AP

| <u>NO.</u> | Register | <u>Function</u> | Data Length | Initial Data |
|------------|----------|-----------------|-------------|--------------|
| 1 | YBWU | VCA9 | 0-63 | 31 |
| 2 | YBWL | VCA10 | 0-63 | 31 |
| 3 | RSAP | DC-AMP1 | 0-63 | 31 |
| 4 | RUBW | VCA5 | 0-63 | 31 |
| 5 | RLBW | VCA6 | 0-63 | 31 |
| 6 | LSAP | DC-AMP2 | 0-63 | 31 |
| 7 | LUBW | VCA10 | 0-63 | 31 |
| 8 | LLBW | VCA2 | 0-63 | 31 |

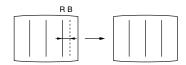

1. YBWU (UPPER Y-BOW)

2. YBWL (BOTTOM BOW)

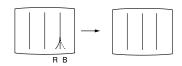

3. RSAP (RIGHT AMP)

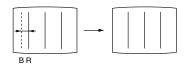

4. RUBW (RIGHT SIDE UPPER C-BOW)

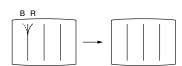

5. RLBW (RIGHT SIDE BOTTOM C-BOW)

6. LSAP (LEFT AMP)

7. LUBW (LEFT SIDE UPPER C-BOW)

8. LLBW (LEFT SIDE BOTTOM C-BOW)

3-4. FOCUS ADJUSTMENT

- 1. Input Monoscope signal.
- 2. Set VIDEO MODE: Standard (RESET).
- Adjust focus VR counter-clockwise to confirm the dot's shape is centered.
- 4. Confirm center focus with focus VR.

3-5. SCREEN (G2)

- 1. Input a monoscope pattern. (NTSC)
- 2. Set to service mode and adjust as follows:

CXA 2150P-2

| No. | Disp. | <u>Item</u> | Avg. |
|-----|-------|-------------|------|
| 00 | ALBK | ALL BLK | 0 |

- 3. Adjust RV9002 on the C Board so that voltage on red, green and blue cathodes is $170.0 \pm 0.5 \text{V}$ DC.
- 4. Adjust horizontal line at top of screen so it is cutoff.

Note: Never set ALBK to 1 when external power supply is connected to cathode.

3-6. PICTURE QUALITY ADJUSTMENT

Initial set-up condition

- 1. Set PRO MODE (Picture: MAX, GAMMA:0)
- 2. Dynamic-color: Off (=Trinitone: MID).
- 3. Set the service mode to the following:

| C21 | <u> 50P</u> | <u>-4</u> |
|-----|-------------|-----------|
|-----|-------------|-----------|

| <u> </u> | | | |
|----------|-------------|--------------------|-----------|
| No. | <u>Name</u> | Control Function | Avg. Data |
| 06 | UDCL | Dynamic Color: OFF | 0 |
| 08 | UGRAM | GRAMMA | 0 |
| 15 | DCTR | DC-TRAN | 0 |
| 16 | DPIC | DYNAMIC PIC:OFF | 0 |

4. Input Signal (480i):

Color Bar Video 75 IRE (White) 75% modulation 7.5% Set-up

Color Bar RF 75 IRE (White) 75% modulation 7.5% Set-up

3-6-1. VIDEO INPUT -Two Picture Sub Contrast Adjustment

- 1. Input a Color Bar signal to VIDEO 1 (75 IRE 75%).
- 2. Set picture mode: P&P (PRO MODE).
- 3. Set to service mode and adjust as follows:

| 04 | E (| חו | 1 |

| No. | <u>Name</u> | Control Function | Avg. Data |
|-----|-------------|------------------|-----------|
| 00 | SBOT | SUB-BRT OFFSET | 7 |
| 12 | SBOF | SUB-BRT OFFSET | 63 |

6. Repeat steps 3 to 5.

3-8. RASTER CENTER ADJUSTMENT

- 1. Input a monoscope signal.
- 2. Set to NTSC (DRC) mode.
- 3. Enter service mode and set the following:

CXA2150P-2

| <u>No.</u> 06 | <u>Name</u> AGNG | AGING1, AGING2 | Avg. Data 2 |
|-------------------------|---------------------|----------------------------------|-----------------|
| CXA2150D-2 No. 02 | <u>Name</u> HSIZ | Control Function Horiz Size | Avg. Data 31 |
| CXA2150D-3 No. 00 | <u>Name</u> HBLK | Control Function Blanking enable | Avg. Data 0 |

- 4. Reduce HSIZ to see sides of raster.
- 5. Adjust H-Center with CXA2150D-2 00.
- 6. Adjust the best screen position with H-CENT and write data.
- 7. Restore aging, HSIZ and HBLK to original condition.

3-9. PICTURE DISTORTION ADJUSTMENTS

3-9-1. NTSC (DRC) Full mode adjustment

- 1. Face picture tube to east or west direction.
- Complete VPIN and VCEN adjustment first. (A2150-D1 05 VPIN, A2150-D1 04 VCEN)
- 3. Input a monoscope and a cross-hatch signal. Adjust picture distortion with the following service parameters to balance the best condition for these two signals.

| A2150-D1 | 00 | VPOS |
|----------|----|-------------|
| A2150-D1 | 01 | VSIZ |
| A2150-D1 | 02 | VLIN |
| A2150-D1 | 03 | VSCO |
| A2150-D1 | 04 | VCEN |
| A2150-D1 | 05 | VPIN |
| A2150-D1 | 07 | HTPZ |
| | | |
| A2150-D2 | 01 | HPOS |
| A2150-D2 | 02 | HSIZ |
| A2150-D2 | 03 | SLIN |
| A2150-D2 | 05 | PIN |
| A2150-D2 | 06 | UCP |
| A2150-D2 | 07 | LCP |
| A2150-D2 | 13 | PPHA |
| A2150-D2 | 14 | VANG |
| A2150-D2 | 15 | LANG |
| A2150-D2 | 16 | VBOW |
| A2150-D2 | 17 | LBOW |

Make sure picture size is within specs. Vertical size is 11.8 sq. and Horizontal size is 15.8 sq.

4. Write data into memory then set screen to 1080i Mode.

CXA2150D-1

0. VPOS (V-POSITION)

1. VSIZ (V-SIZE)

2. VLIN (V-LINE)

3. VSCO (VS-COR)

7. HTPZ (H-TRAPEZOID)

CXA2150D-2

1. HPOS (H-POSITION)

2. HSIZ (H-SIZE)

5. PIN (PIN AMP)

6. UCP (UP COR PIN COR)

7. LCP (LOW CO PIN COR)

13. PPHA(PIN PHASE)

14. VANG (AFC-ANGLE)

15. LANG (L-ANGLE)

16. VBOW (AFC-BOW)

17. LBOW (L-BOW)

3-9-2. 1080i HD mode adjustment

- 1. Input a 1080i HD cross-hatch signal and an HD monoscope signal that contains overscan markers.
- 2. Adjust raster position per section 3-8 only if this procedure was not performed for full mode.
- 3. Adjust geometry similar to Full DRC mode. Vertical size is 11.8 sq. and Horizontal size is 15.8 sq if monoscope signal is available. Otherwise use Vertical size as 91.5% scan, Horizontal size as 90% scan.
- 4. Use the following register to adjust the horizontal parameter:

A2150-D2 01 HPOS

If necessary, touch up geometry using the data register listed above for Full mode.

5. Write data into memory.

3-9-3. Vertical Compressed Mode Check and Confirmation

- 1. Input a monoscope and a cross-hatch signal.
- 2. Check vertical compressed mode.

SECTION 4 SAFETY RELATED ADJUSTMENTS

RV8001, RV8002, RV8003 CONFIRMATION METHOD AND HV SERVICE ADJUSTMENTS

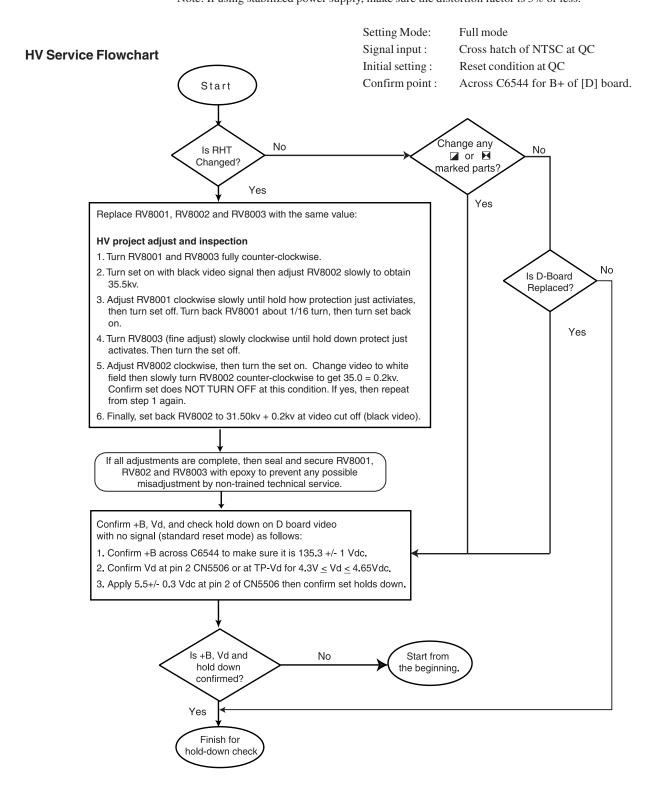

B+ Max Confirmation: Standard: 135.3 ± 1 VCD

Check Condition: AC input voltage: 120 (± 2) VAC at Board Adjustment Process

130 (± 2) VAC at QC

120 (± 2) VAC at Overall Adjustment (After aging)

*Note: If using stabilized power supply, make sure the distortion factor is 3% or less.

SECTION 5 CIRCUIT ADJUSTMENTS

ELECTRICAL ADJUSTMENTS BY REMOTE COMMANDER

Use the Remote Commander (RM-Y74) to perform the circuit adjustments in this section.

NOTE: Test Equipment Required:

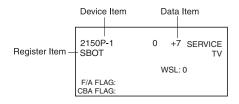

- 1) Pattern generator
- 2) Frequency counter
- 3) Digital multimeter
- 4) Audio oscillator

5-1. SETTING THE SERVICE ADJUSTMENT MODE

- 1. Standby mode (power off).
- 2. Press each of the following buttons on the remote within a second of each other:

SERVICE ADJUSTMENT MODE VIEW

Reading the Memory

- 1. Enter into Service Mode
- 2. Press 0 on the remote commander.
- 3. Press ENTER to read memory.

Adjusting the Picture

- 1. Enter into Service Mode.
- 2. Press 2 or 5 on the remote to select the device item.
- 2. Press 1 or 4 on the remote to select an item.
- 3. Press 3 or 6 on the remote to change the data.
- 4. Press MUTING then ENTER to save into the memory.

RESETTING THE DATA

Note: Be careful when using the remote! It will clear and reinitialize ALL NVM data including deflection adjustment data if not reset properly as follows:

Resetting the Deflection NVM Data

- 1. Enter into Service Mode.
- 2. Press 7, MENU, and then press Enter on the remote.

Resetting the System NVM Data

- 1. Enter into Service Mode.
- 2. Press 7, then 9, and then press Enter on the remote.

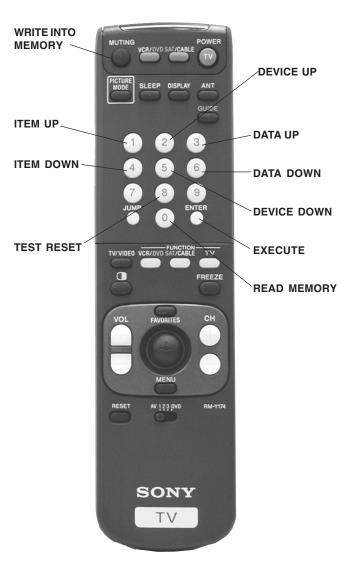

Resetting the User Data

- 1. Enter into Service Mode.
- 2. Press 8, and then press Enter on the remote.

5-2. MEMORY WRITE CONFIRMATION METHOD

- After adjustment, remove the power plug from the AC outlet, then plug it in again.
- 2. Turn the power switch ON and set to service mode.
- Call the adjusted items again to confirm they were adjusted properly.

5-3. ADJUSTMENT BUTTONS AND INDICATORS

SECTION 6 DIAGRAMS

6.1 BLOCK DIAGRAM (1/4)

6-2. CIRCUIT BOARDS LOCATION

6-3. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

- All capacitors are in μF unless otherwise noted. pF : μμF 50WV or less are not indicated except for electrolytics and tantalums.
- All electrolytics are in 50V unless otherwise specified.
- All resistors are in ohms.

 $K\Omega$ =1000 Ω , $M\Omega$ =1000 $k\Omega$

is as follows. Pitch: 5mm
Rating electrical power: 1/4W

- 1/4 W in resistance, 1/10 W and 1/8 W in chip resistance.
- - : nonflammable resistor.
- -----: fusible resistor.
- △ : internal component.
- _____: panel designation and adjustment for repair.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- Readings are taken with a color-bar signal input.
- ullet Readings are taken with a 10M Ω digital multimeter.
- Voltages are DC with respect to ground unless otherwise noted.
- Voltage variations may be noted due to normal production tolerances.
- All voltages are in V.
- S: Measurement impossibillity.
- : B+line.

: B-line. (Actual measured value may be different).

- : signal path. (RF)
- Circled numbers are waveform references.
- The components identified by in this basic schematic diagram have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.

When replacing components identified by , make the necessary
adjustments indicated. If results do not meet the specified value, change
the component identified by and repeat the adjustment until the
specified value is achieved. (Refer to safety adjustments on Page 23.)

KV-32XBR400/36XBR400/36XBR400H/38DRC1/38DRC1C

 When replacing the part in below table, be sure to perform the related adjustment.

The symbol - display is on the component side.

The components identified by shading and mark ⚠ are critical for safety. Replace only with part number specified.

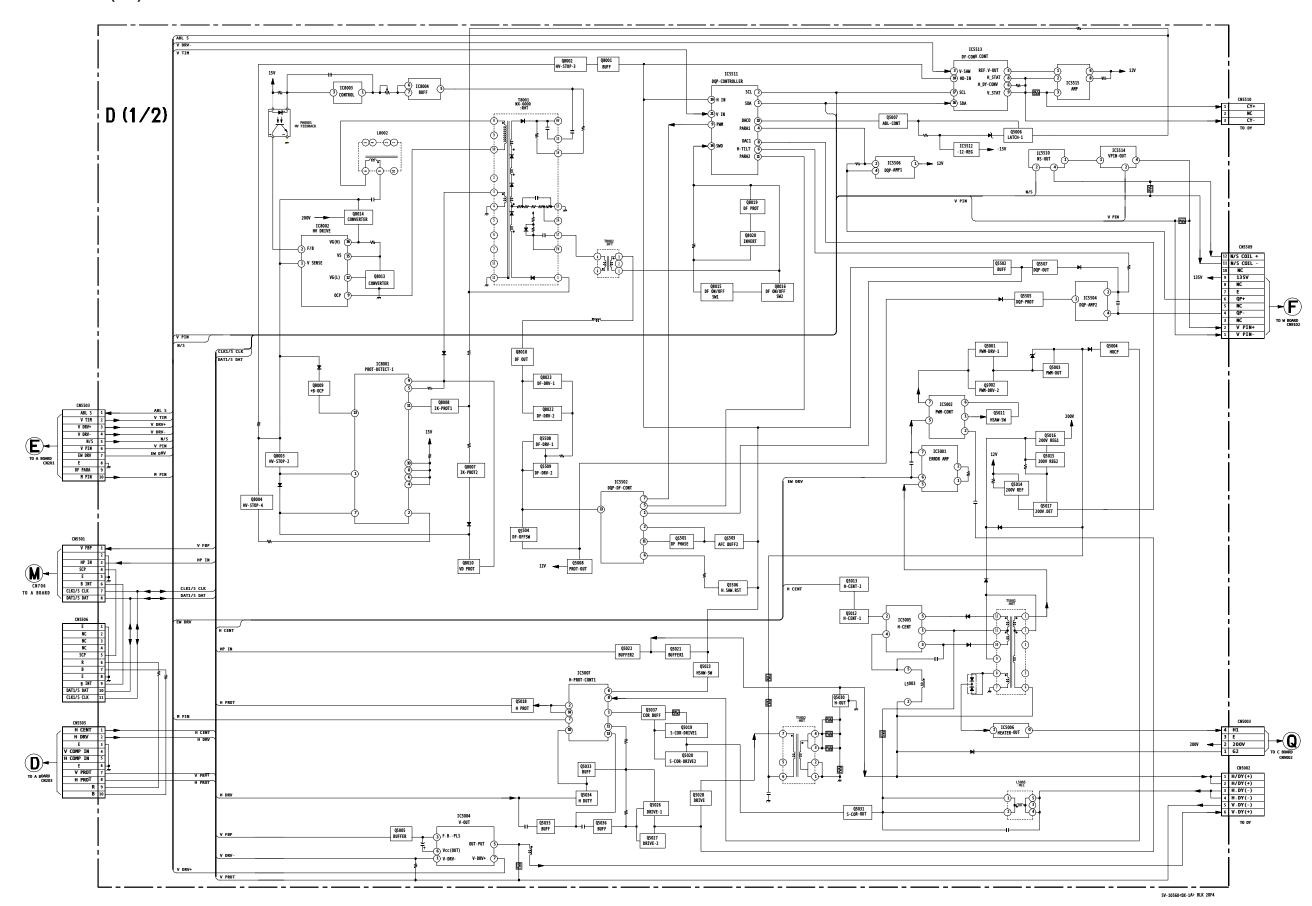

The symbol - indicate fast operating fuse.

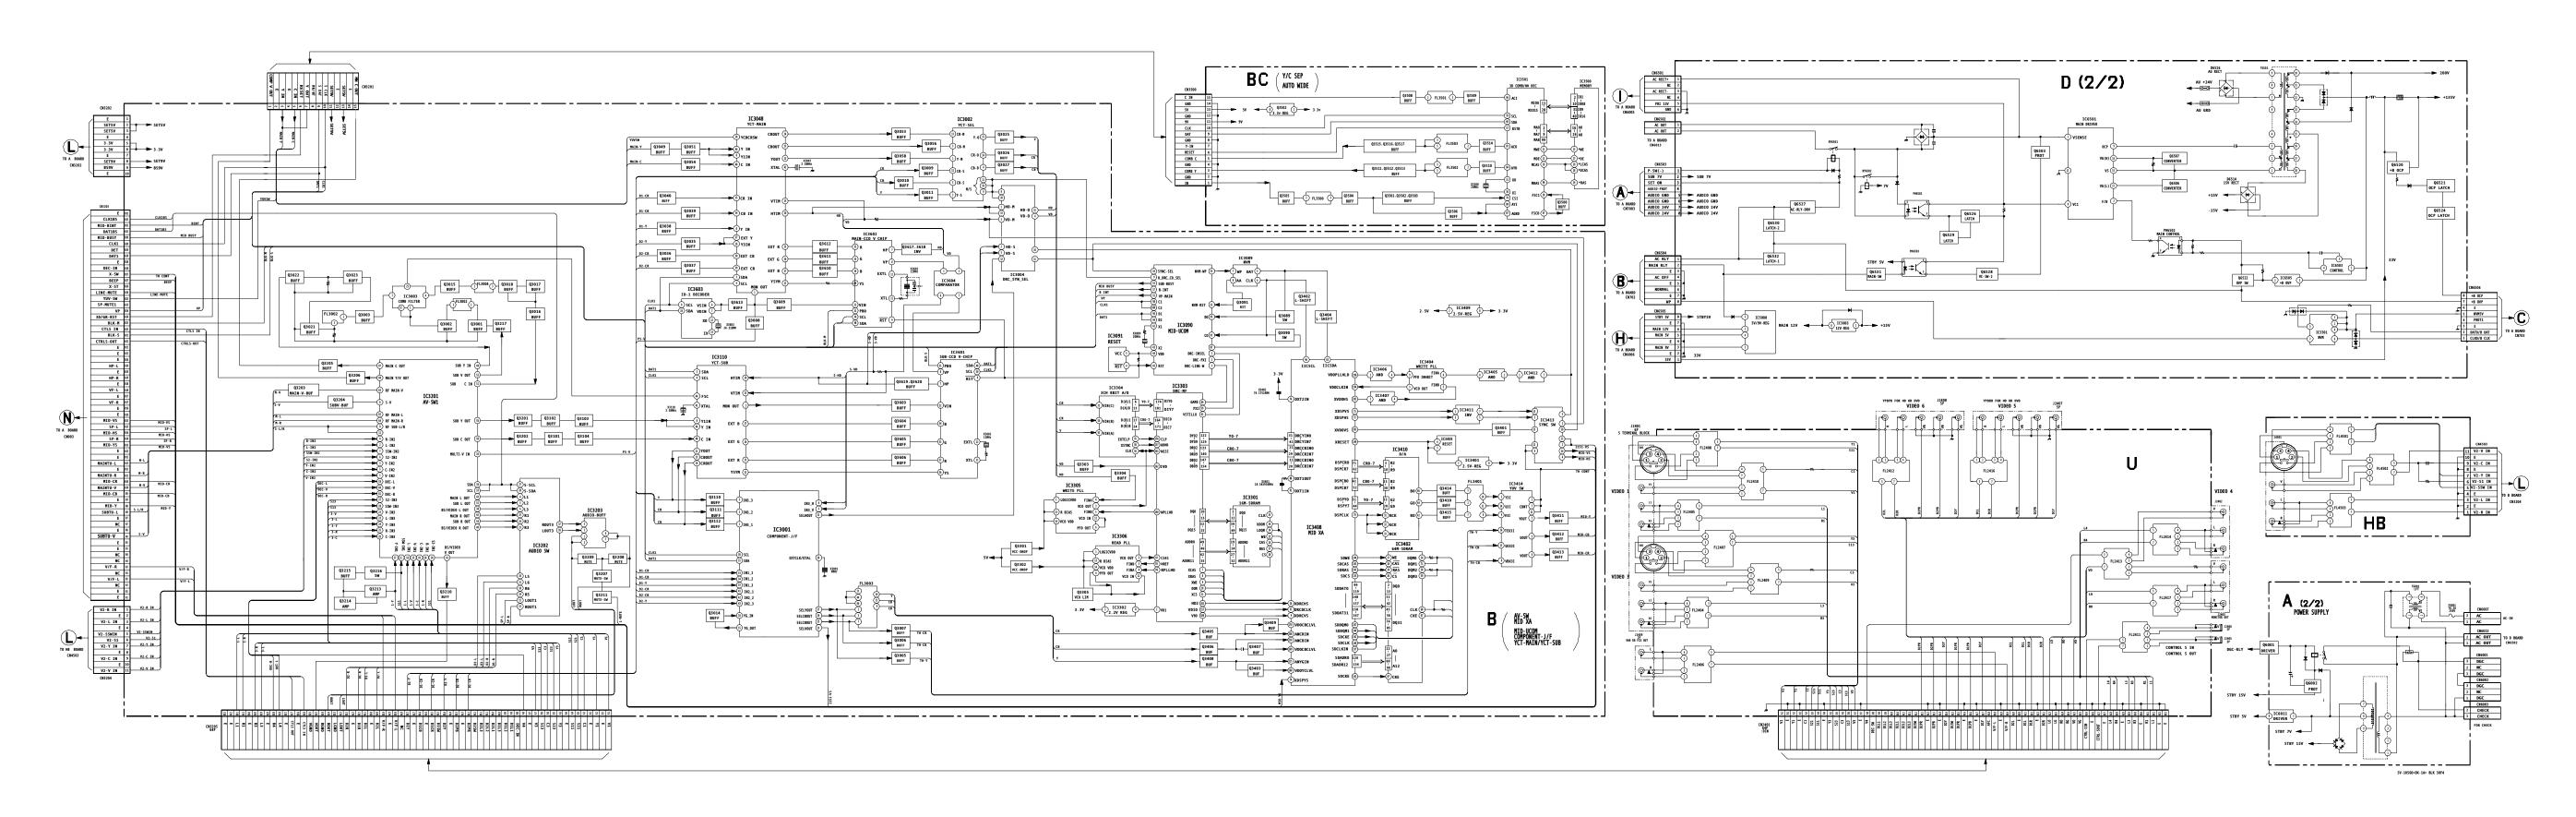

Replace only with fuse of same rating as marked.

Les composants identifiés per un tramé et une marque $\underline{\Lambda}$ sont critiques pour la sécurité. Ne les remplacer que par une piéce portant le numéro spécifié.

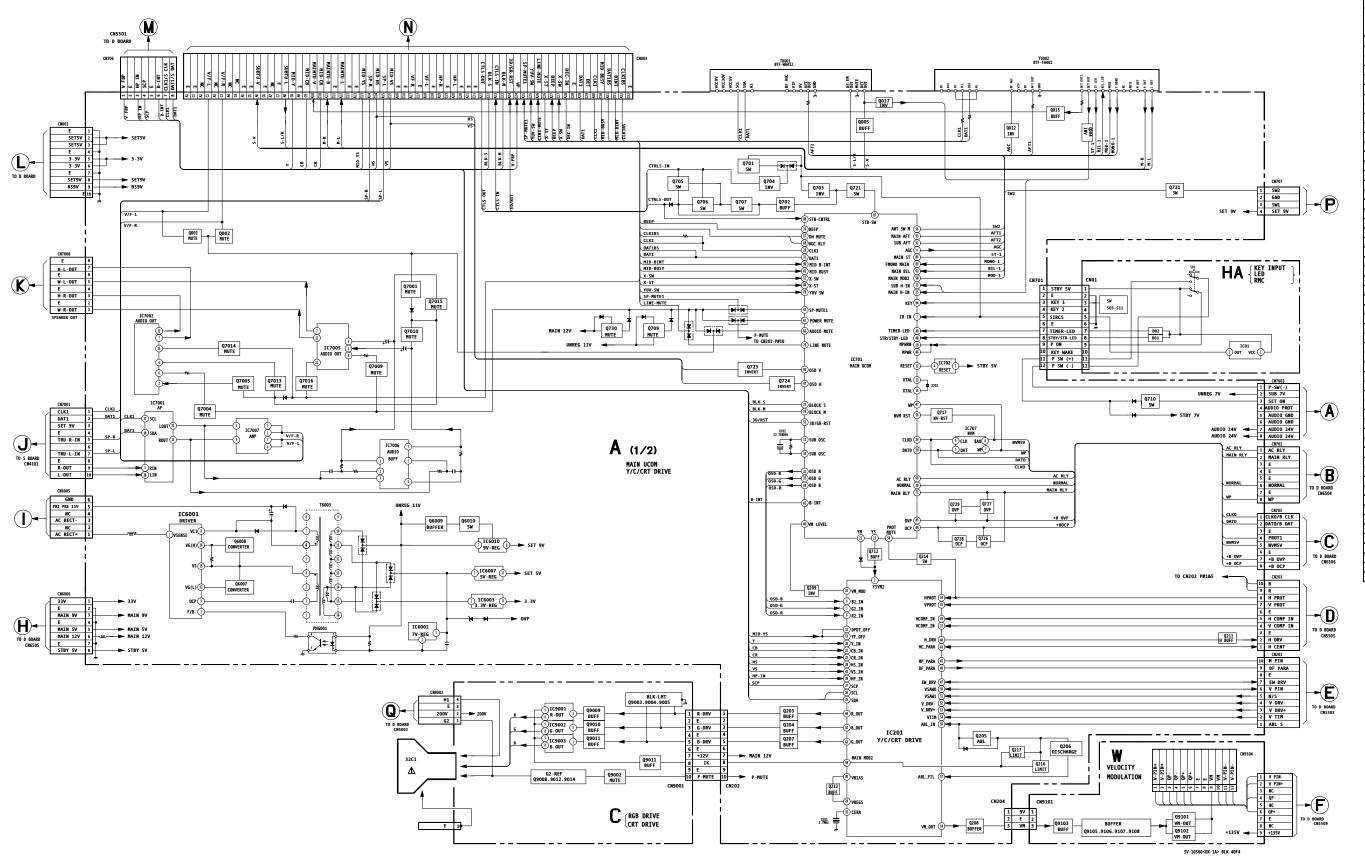

Le symbole - indique une fusible a action rapide. Doit etre remplacee par une fusible de meme yaleur, comme maque.

SECTION 7 EXPLODED VIEWS

• Items with no part number and no description are not stocked because they are seldom required for routine service. • The component parts of an assembly are indicated by the reference numbers in the remarks column.

specifie.

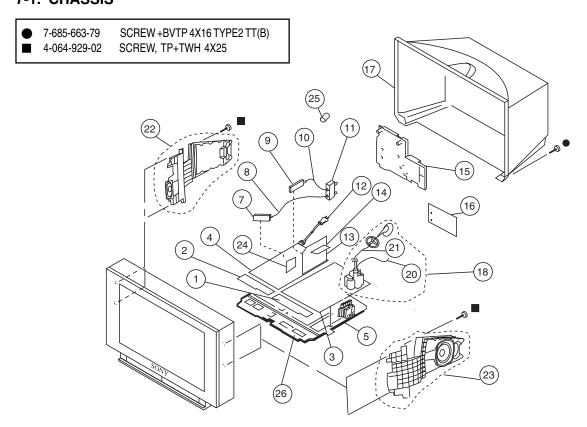

• Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

Note:

The components identified by shading and mark \triangle are critical for safety. Replace only with part number specified.

7-1. CHASSIS

Note: Les composants identifies per un trame et une marque $\dot{\mathbb{N}}$ sont critiques pour la securite. Ne les remplacer que par une piece portant le numero

BC

Note:

The components identified by shading and mark \triangle are critical for safety. Replace only with part number specified.

Note:

Les composants identifies per un trame et une marque \(\frac{\hat}{\lambda} \) sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

SECTION 8 ELECTRICAL PARTS LIST

The components identified by in this manual have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.

• Items marked with a asterisk "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items

• All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

RESISTORS

- · All resistors are in ohms
- F: nonflammable

When indicating parts by reference number, please include the board name.

The components identified by shading and mark <u>A</u> are critical for safety. Replace only with part number specified.

Les composants identifies per un trame et une marque \(\underset{\Lambda} \) sont critiques pour la securite. Ne les remplacer que par une1 piece portant le numero specifie.

The components identified by shading and mark <u>^</u> are critical for safety.
Replace only with part number specified.

Les composants identifies per un trame et une marque \(\underset{\Lambda} \) sont critiques pour la securite. Ne les remplacer que par une1 piece portant le numero specifie.

| | | | L | | | | numero specifie. | | |

The components identified by shading and mark Λ are critical for safety.

Replace only with part number specified.

Les composants identifies per un trame et une marque $\underline{\wedge}$ sont critiques pour la securite. Ne les remplacer que par une1 piece portant le numero specifie.

The components identified by shading and mark <u>A</u> are critical for safety.

Replace only with part number specified.

Les composants identifies per un trame et une marque $\underline{\wedge}$ sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

The components identified by shading and mark <u>A</u> are critical for safety.

Replace only with part number specified.

Les composants identifies per un trame et une marque <u>A</u> sont critiques pour la securite. Ne les remplacer que par une1 piece portant le numero specifie.

The components identified by shading and mark <u>\(\cdot \)</u> are critical for safety.

Replace only with part number specified.

Les composants identifies per un trame et une marque $\underline{\wedge}$ sont critiques pour la securite. Ne les remplacer que par une1 piece portant le numero specifie.

| | | | | | | | n | umero specifie. | | | |

The components identified by shading and mark Λ are critical for safety.

Replace only with part number specified.

Les composants identifies per un trame et une marque $\underline{\wedge}$ sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

The components identified by shading and mark <u>A</u> are critical for safety.
Replace only with part number specified.

The components identified by in this manual have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.
